

# Pipe support

In order to ensure peace of mind and peace of mind in view of a possible flood, MegaSecur offers you a support for your pump hose, so you can direct the water jet to the desired location.

## MegaSecur

A Canadian designer, manufacturer and distributor, MegaSecur is the world leader in flood control solutions. In addition to its Water-Gate self-blocking flexible dam, it offers a pump system specially designed to help you control possible flooding.

It is important to have water pumps in sufficient quantity to remove excess water during floods. However, the discharge hose is often too heavy and weighs down on the front of the barrier, causing water to enter over the barrier. Our hose hanger is designed specifically to attach to the Water-Gate water barrier. Also it can receive several pipe sizes at the same time. The bracket eliminates the risk of the barrier collapsing, as it is constructed from aluminum rods accommodating barriers of up to 1 meter / 40 inches of restraint.
